

Kol Kesav turns dictation and recorded shiurim into written notes, finds the Mareh Mekomos (sources) that were said, and keeps your notes private to your account on every device you use. Nothing to set up: transcription is included in your plan.

Your account

החשבון שלכם

- Open **kolkesav.com** and tap **Create account**. Type your email and a password (8 or more characters) twice, then tap **Create account**. Every new account starts on the Free plan (1 hour a month).
- Next time, use **Log in** with your email (or the username you were given) and password.
- Your notes, write-ups and translations sync to every device where you log in. Recordings stay only on the device that made them.

Forgot password

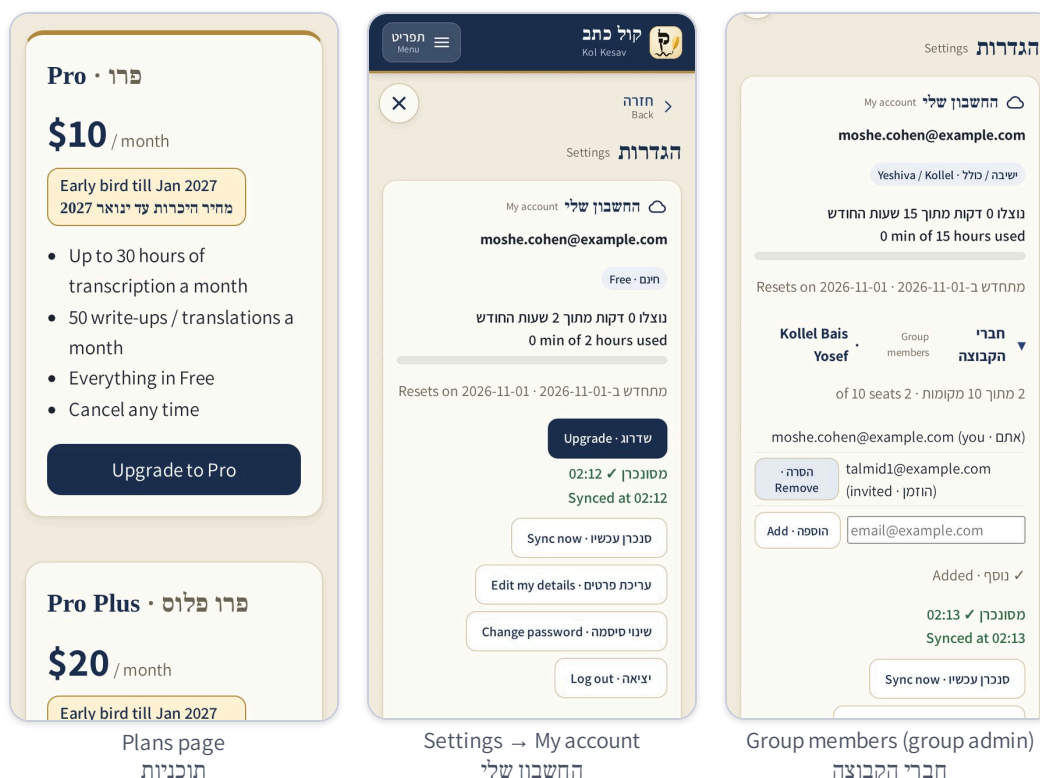

שכחתי סיסמה

- On the Log in screen tap **Forgot password?**, type your email or username and tap **Send**.
- Kol Kesav emails you a temporary password from **support@kolkesav.com** (check your spam folder). It is good for 24 hours, and your old password keeps working until you use the temporary one.
- Log in with the temporary password. Before anything else the app asks you to **choose a new password** of your own (8 or more characters).
- No email? Write to **support@kolkesav.com**.

Plans and hours

Plan	Price	Transcription
Free חינם	\$0	1 hour a month
Pro פרו	\$10 / month Early bird till Jan 2027	Up to 30 hours a month, 50 write-ups / translations
Pro Plus פרו פלוס	\$20 / month Early bird till Jan 2027	Up to 60 hours a month, 100 write-ups / translations
Yeshiva / Kollel ישיבה / כולל	\$55 / month Early bird till Jan 2027	10 people, each 15 hours and 25 write-ups / translations a month. The admin adds members.
Yeshiva / Kollel Pro ישיבה / כולל פרו	\$110 / month Early bird till Jan 2027	10 people, each 30 hours and 50 write-ups / translations a month.

- Hours count the length of the audio sent for transcription, per calendar month. Unused hours don't roll over. Settings shows how much you used and when it resets.
- When your hours run out, your notes stay: you can still read, copy and export them. New transcription waits for an upgrade or the next month.
- To upgrade: Settings → **Upgrade** (or **Plans** on the login screen), choose a plan, and pay on the secure payment page. Your plan switches on, usually within a minute.
- Manage subscription** (Settings) changes your card or receipt email, or cancels. A cancelled plan runs to the end of the period you paid for. Switching Pro ↔ Pro Plus (or Kollel ↔ Kollel Pro) is one tap: up starts now for the difference; down starts next month.

Yeshiva / Kollel groups

קבוצה

- The person who buys the Yeshiva / Kollel (or Kollel Pro) plan is the group admin, and counts as one of the 10.
- Settings → **Group members** (tap to open) → type a member's email → **Add**. Someone who already has a Kol Kesav account joins at once. Anyone else shows as "invited" and joins by themselves when they create an account with that email.
- Remove** takes a member out of the group. Each member's notes stay private to them.

My account

- Settings → **My account** shows your plan, hours and details.
- **Edit my details**: name, email (changing it asks for your current password), phone and yeshiva/organization (both optional). **Save**.
- **Change password**, **Sync now** and **Log out** are on the same card.
- **Delete account** (inside Edit my details): type your password and tap **Delete my account**. This deletes the account and all its notes on the server and can't be undone; notes already on this device stay on it. If you pay for a plan, cancel it in Manage subscription first.

הכתבה

Dictating notes

- Press the round button and speak; press again to stop. The text appears in Notes and you can edit it directly. Sources you mention go to the Mareh Mekomos tab by themselves.
- If nothing was said, no note is made (*"No speech was heard, so no note was made."*).
- Each time you open the app it starts on a new, empty page; earlier notes are in ☰ Menu → **Past sessions**. A page left empty isn't saved.
- **Voice commands** (☰ Menu): "period", "comma", "new paragraph", "open paren"... in English or Hebrew format the text and aren't typed.
- Shiur language: **Hebrew**, **English + עברית** (hybrid) or **English transliterated**. In Hebrew, Yiddish is written in Yiddish spelling and not translated.

שיעורים מוקלטים

Recorded shiurim

- ☰ Menu → **Upload shiur**: choose an audio file (mp3, m4a, wav or webm, up to about 90 minutes) The whole shiur is transcribed with a time at each paragraph. The result is a draft: check names, dafim and sources; words marked [?] were unclear.
- **Translate to Hebrew right away**: the Hebrew translation starts by itself when the transcript is ready.
- **Main speaker only** New · being tested: removes the questions and comments of others; a bar above the note switches back to **Show full (with others)**.
- **Spoken edit commands** New · being tested: when the speaker says "take that out", "scratch that", "restart", "תמחק את זה" or "מעק דאס אויס", the part he dropped and the command are left out. A quote or teaching stays. Also offered on the Translate page.

עבודה עם רשימה

Working with a note

- **Show timestamps** (main screen): off hides every time, on screen, in the edit box and in saved files. Tap a time to play the recording from there (on the device that has the audio).
- **Mareh Mekomos** tab: sources grouped by topic; **Edit** to fix by hand; the **masechta** chip sets the masechta for "daf 37" with no masechta named.
- Under a note: **Copy**, **Word** (.docx), **Text file**, **Write-up** (a clean, organized summary) and **Translate to Hebrew** (for notes with English or Yiddish).
- ☰ Menu → **Past sessions**: tap a note to open it. **Delete** asks once and it's gone; **Delete audio** keeps the text.

התקנה ובלי אינטרנט

Installing and offline

- Android (Chrome): kolkesav.com → ⋮ menu → **Add to Home screen**. iPad / iPhone (Safari): Share → **Add to Home Screen**. PC: the install icon in Chrome or Edge's address bar.
- The app opens without internet and saves what you type; transcription, Write-up and Translate need internet. Changes sync when you're back online.
- To get the newest version: close the app completely and open it again.
